

Sceti Bioscience Export now distributed by **TEMA ricerca**

About Sceti Bioscience Export

SCETI has introduced to worldwide markets Japan made research products in the field of life-science and biotechnology for years. Due to the overwhelming demand from overseas users, we have consolidated our products range expanding to clinical diagnostics and industrial applications.

We source only high quality and proven stable solutions that guarantee our worldwide users best accuracy and reliability for handling their respective studies and diagnostics procedures.

Sourcing the best from Japan, our objective is to contribute indirectly to improving the level of research studies & diagnostics performed worldwide via our valued overseas customers.

Immunoassays

Wide range immunoassays of peptides , proteins , oxidation / stress markers, and other biomarkers for human / rat / mouse etc.

- EIA and ELISA

Reagents and Proteins

Reagent supporting studies in DNA Replication, Recombination and Repair

- Genetic Engineering
- cDNA Libraries
- Recombinant proteins
- Bacterial Protein toxins
- HIV-1 Recombinant Proteins

Antibodies

Antibodies and etc. for Bioscience and Genetic studies

- Peptides
- DNA Related
- Yeast Transcription Factors
- Viruses and Infectious Agents
- Cancer and Signaling
- Bacterial Toxins
- Immunology
- Cell Biology
- Others

Related Supplies

Supplies related to Bioscience

- Blocking reagents
- Others

Food and Environment

Tools for studies in Toxin, Environment and etc.

- Toxin assays
- Environmental substance assay
- Others

Others

Tools for Cell Culture and etc.

- Normal cells
- Cell Culture
