

## 11,000 Expression-Verified cDNA Clones for Immediate Use

OriGene's TrueORF clones are complete ORF clones with fused Myc-DDK\* tags. Not only are they sequence verified, our ongoing validation process has produced Western blot data for over 11,000 clones.

Why TrueORF is superior to gene-synthesis?

	Gene-synthesis	TrueORFs
Protein expression verification	No	<b>Yes</b> for over 11,000 clones
Cost	High	<b>Low</b>
Delivery	Weeks/months	<b>Immediate</b>
Transfection-ready plasmids	No	<b>Yes</b>

\*DDK is the same as FLAG From Sigma-Aldrich

- Over 11,000 with protein expression data
- Ready for expression in mammalian cells
- Easily shuttled into [E.coli vectors](#)
- 10 ug pure plasmids for immediate transfection

### Summer Promotion:

30% off for the 11,000 TrueORF clones

Valid till September 30th, 2009
